Speier, Maria Ellen Chiaia, Audrey Punnett, Susan Williams, Robert Tyminski, and Steve Zimmelman. This handbook considers sandplay therapy in medicine, sandplay with special populations, sandplay in analysis, and general practice. Adaptions of the sandplay method in education, sandplay and the spirit, non-jungian uses of the sand tray in therapeutic applications, unique in scope and breadth. This handbook will appeal to academics and students of jungian psychotherapy as well as occupational therapists, art and play therapists, and all clinicians using sandplay therapy as part of their professional practice.

Sandplay in Three Voices provides a unique and engaging understanding of sandplay, a growing modality of psychotherapy emerging out of informal conversations among three senior therapists. It examines the essential aspects of sandplay therapy as well as the depth and breadth of the human psyche. The book is organized into eight sections covering eight of the most important topics in sandplay therapy: silence, child, mother, self, shadow, chaos, and numinous. Each section begins with a triologue discussing theory, history, and practice of sandplay in that area. The triologues allow the reader to witness three senior therapists addressing and attempting to understand the many layers of each topic and reflect their agreements and disagreements as they reveal their individual thoughts on and personal experiences of the themes they discuss. Each triologue is followed by a set of solo presentations in which each author focuses on her contribution and on the role of each topic in sandplay, illustrated by original clinical examples. This unique approach addresses issues of concern to analysts and other psychotherapists. Its basic orientation makes it of particular value in the study, practice, and teaching of sandplay therapy.

C. G. and Emma Jung recognized that Dora Kalff had an unusual ability to relate to children and their inner lives, and so encouraged her to extend Jung's work to the treatment of children. Kalff brought to this endeavor her experience as a student of languages including Sanskrit and Chinese, classical piano, and eastern contemplative practices. She traveled from her native Switzerland to London where she studied with Margaret Lowenfeld and was influenced by her contacts with D. W. Winnicott. Kalff developed a way of working she called *Sandspiel* or sandplay. This method introduced a shallow sandbox in which the patient could arrange the sand in whatever form expressed itself from within, with or without the addition of miniatures. In this book, Kalff presents nine case studies which include sandplay in the therapeutic work. She conveys the importance of the therapist's empathic acceptance of the patient, creating a free and protected space, as well as the experience required to understand and be affected by symbolic reflections of inner dilemmas, and to recognize the psychic organization represented by the patient in the sand. Supervision of sandplay therapy: the first book on this subject is an internationally based volume that describes the state of the art in supervision of sandplay therapy, recognizing that practitioners are eager to incorporate sandplay therapy into their practice. Harriet Friedman and Rie Rogers Mitchell respond to the need for new information and successfully translate the theories of sandplay therapy into supervision practice. The book provides a meaningful connection and balance between theoretical principles, practical application, and ongoing therapeutic encounter involved in sandplay, divided into six sections. Contributors cover original supervision models, contemporary supervision models, special challenges in supervision, international sandplay supervision, supervision of special groups, connections with other arts therapies, supervision of sandplay therapy expands the vision of what is possible in supervision and will be vital reading for those studying supervision and sandplay therapy, as well as for those wanting to provide a depth-oriented approach during supervision. The yield of more than forty years of John Allan's clinical work with children, both normal children in classrooms and those physically and sexually abused, emotionally neglected, and terminally ill. This book describes different ways to use art in counseling children through both spontaneous and directed drawing, guided imagery, and active imagination, rooted in C. G. Jung's theory of the regenerative self-healing ability of the psyche. Allan's approach is pragmatic, sensitive, and respectful. His clear language and feeling for his cases make the book widely accessible, so that anyone involved with children, parents, teachers, and counselors will find the ideas immediately useful and encouraging. The wealth of drawings, paintings, and writings by children give us entry to a profound dimension of both their suffering and strength. This practical, user-friendly manual shows mental health professionals how to implement play therapy with adolescents and adults, and how to conceptualize client struggles using a wealth of creative approaches. **Creative Play Therapy with Adolescents and Adults** follows an accessible seven-stage process for professionals to address clients' core needs and establish an empathic therapeutic relationship. The book charts the stages of play therapy and explores a range of expressive arts including art, drama, dance, writing, and sand play, and the key materials needed for each. It also considers additional aspects of play therapy including resistance, spirituality, and self-care, filled with techniques, skills, and case studies to help demystify complex client work. The book outlines an easy-to-follow treatment protocol for healing and resolution. This book will be of interest to a wide range of mental health professionals working with adults and adolescents, as it encourages a more creative career and lasting, tangible progress in clients' lives. *World of the Child* won the 1987-88 Best Book Award from the Canadian Guidance and Counseling Association. Praise for integrating expressive arts and play therapy with children and adolescents: with this book, Drs. Green and Drewes have filled an important void in the play therapy literature, namely the integration of the expressive arts in play therapy with children and adolescents. They have assembled the best theorists and practitioners of the expressive arts and given them an appropriate structure to write their chapters. The book is outstanding and provides readers with in-depth case studies, detailed methodologies, research findings, and is a useful resource for further training options. I recommend this book most highly for trainers, practitioners, and graduate students.
