deemed them incompatible with their respective national traditions accordingly this volume has a two fold ambition to excavate the hitherto unknown eugenic movements in central and southeast europe and to explain their relationship with racism nationalism and anti semitism on the one hand the historiographic perspective substantiated in this volume connects developments in the history of racial anthropology genetics and eugenics with political ideologies such as racial nationalism and anti semitism on the other hand it contests the sonderweg approach adopted by scholars dealing these phenomena in central and southeast europe by arguing that concerns with eugenics and race were as widely disseminated in these regions as they were in western europe and north america book jacket
